

# Master Builder

## SUCCESS WITH HIGH PERFORMANCE ATTICS AND HIGH PERFORMANCE WALLS

The San Diego Gas and Electric (SDG&E) **Master Builder Program** is a distinctive code-readiness initiative that recognizes and supports early adoption of two key 2016 Title 24 measures: (1) *high performance attics*, and (2) *high performance walls*.

## BENEFITS

**Master Builder** offers assistance and benefits:

- \$20,000 - \$40,000 in financial support for high performance attic and high performance wall adoption
- Exclusive consulting services from dedicated subject matter experts to guide projects from design to construction, including management and coordination of design meetings
- On-site trainings for your design team and subcontractors, and installation guidance from product manufacturers
- Potential product discounts from participating manufacturers

## ELIGIBILITY

Eligible **Master Builders**:

- Complete 10 new single-family project lots (homes) with either one or both measures
- Host a design workshop and value engineering meeting with the project team and program staff
- Agree to feature and promote the project through case studies, industry events, and publications
